ABSTRACT (ENGLISH)

This article offers an empirical exploration on the use of character-level convolutional networks (ConvNets) for text classification. We constructed several large-scale datasets to show that character-level convolutional networks could achieve state-of-the-art or competitive results. Comparisons are offered against traditional models such as bag of words, n-grams and their TFIDF variants, and deep learning models such as word-based ConvNets and recurrent neural networks.

DETAILS

Subject:	Text editing; Neural networks; Recurrent neural networks; Classification; Machine learning; Artificial neural networks
Identifier / keyword:	Machine Learning; Computation and Language
URL:	http://arxiv.org/abs/1509.01626
Publication title:	arXiv.org; Ithaca
Publication year:	2016
Publication date:	Apr 4, 2016
Section:	Computer Science
Publisher:	Cornell University Library, arXiv.org
Source:	arXiv.org
Place of publication:	Ithaca
Country of publication:	United States
University/institution:	Cornell University Libr ary arXiv.org
Publication subject:	Biology, Statistics, Physics, Mathematics, Engineering--Electrical Engineering, Computers--Computer Engineering, Business And Economics--Banking And Finance
e-ISSN:	2331-8422
Source type:	Working Paper

Language of publication:	English
Document type:	Working Paper
Publication history :	
Online publication date:	2016-04-05
